Available for a final-year internship (PFE) from late January 2027 — duration: 4 months

PROFILE

Final-year Bachelor's student in Big Data & Data Analytics, skilled in Python, SQL, Power BI and Hadoop (HDFS, MapReduce), with hands-on projects in data processing, dashboards, web development and AWS cloud deployment. Rigorous and autonomous, I am looking for a final-year internship in data analysis, BI, data engineering or AI to contribute to concrete business projects.

ACADEMIC PROJECTS

E-commerce Big Data Analysis — Hadoop MapReduce *2026*
- 1,050,000 transactions in HDFS, 5 MapReduce jobs (Python, Java): top products, revenue by category, trends, baskets.

Power BI Dashboards *2026*
- 18,457 LEGO sets and 14,838 data-job salaries: data modeling, DAX measures, what-if parameters, decomposition trees.

SmartEdu — Multi-role Learning Platform *2026*
- React, TypeScript, Supabase (PostgreSQL): role-based access, courses, forum, statistics; deployed on AWS EC2 / Nginx.

TechVest — Tech Investment Platform *2025*
- Java OOP (inheritance, polymorphism, DAO, exceptions): IT job-market analysis and crowdfunding, JDBC/SQLite, UML.

Student Management — PHP / MySQL *2026*
- Secure full CRUD app (PDO prepared statements, XSS protection) with a redesigned Bootstrap 5 interface.

EduArchive — University Document Management
- Object-oriented PHP app (MVC, CRUD) centralizing documents across several universities.

AWS Cloud Portfolio — EC2 & Nginx
- Ubuntu EC2 instance configured on AWS to host a portfolio website served by Nginx.

WORK EXPERIENCE
